RE: Exploration Letter of Intent

Dear Mr. Braxton:

* Diamond Bullion Corporation would like to expand its previous letter of intent (October 14, 1985) to include collection of bulk samples from 3 mine dumps in the Tintic Mining District, Juab County, Utah. Our intent is to excavate three 1 to 3-ton samples from the sites indicated on the attached map. A backhoe/front-end loader would be used for this purpose. Access to the dumps would be on existing roads. No reclamation plans are considered because of the lack of vegetation on the mine dumps and the sample sites will be too small and shallow to pose any safety hazard.

This sampling program will be a cooperative effort between Diamond Bullion and the Salt Lake City Research Center of the U.S. Bureau of Mines. It is imperative that we collect the samples before the severe winter weather sets in. Therefore, we would appreciate any effort on your part to expedite the approval process. We hope to commence sampling on November 18, 1985.

Thank you for your consideration.

Sincerely,

DIAMOND BULLION CORPORATION

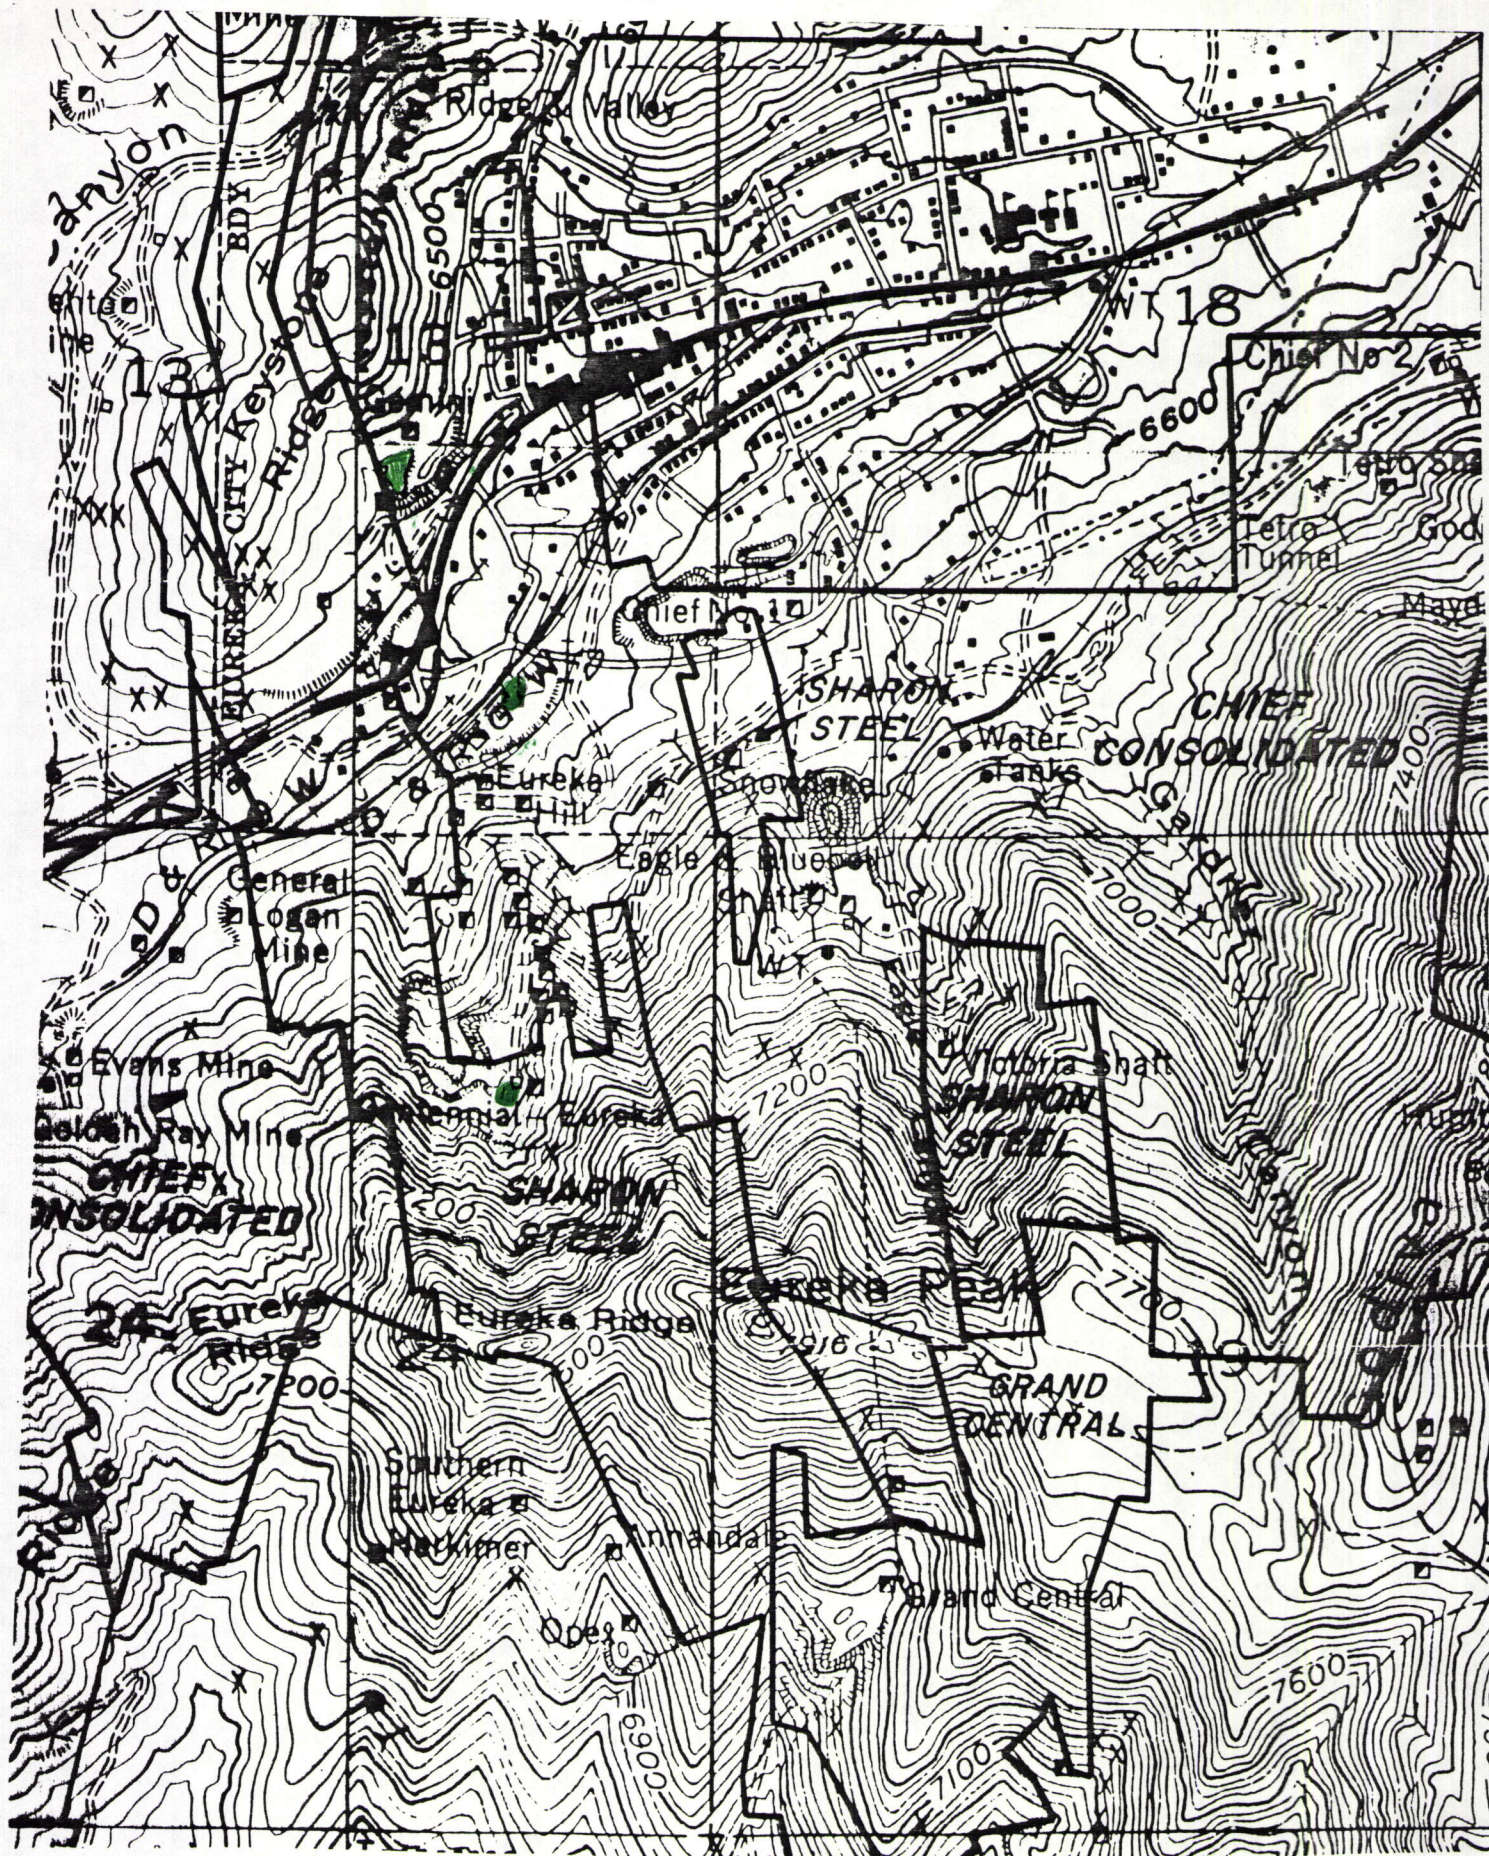

David A. Mako
Geologist

* GAVE me mako 3 DOE forms
(1 per site) advised him to
complete each, submit for approval
